

ChitoSAM[®] 100

PRODUCT FAMILY TECHNICAL DATA SHEET

Finished Product Description

The ChitoSAM[®] 100 Product Family is a high-performance hemostatic dressing designed to control moderate to severe bleeding fast. ChitoSAM works independently of the body's normal clotting processes. The non-woven dressing is spun directly from chitosan which is derived from snow crab shells. Studies have demonstrated the safety of chitin-derived products in patients allergic to shellfish; including a published finding that "all subjects tolerated the (chitosan) bandage without reaction."¹ The dressing contains no cotton, rayon or polyester.

Indications for use

ChitoSAM[®] 100 products are for use as a temporary external dressing to control moderate to severe bleeding and manage external abrasions and lacerations.

Material Technical Data

Product Materials

- Description: 100% chitosan hemostatic dressing
- Sizes: Three options, | Single Ply: 4"x4" (10cm x 10cm), Z-Fold: 3"x4' (7.6cm x 122cm) and 3"x6' (7.6cm x 183cm)
- Sterilization Method: Gamma Irradiation
- Shelf Life: 5 years
- Does not contain natural rubber latex.

Instructions for use

- Printed on packaging. Visit sammedical.com for additional training materials and support.
- Complete product information and disclosures are listed in the Instructions for Use and available at sammedical.com/eIFU.
- Single Use Only. Dispose of used device per healthcare facility biohazard protocol. Reuse of device may cause illness or injury.
- Prescription Use Only.
- Do not place over eyes.
- Contains chitosan from shellfish. If shellfish allergy is a concern, please consult your doctor.
- Dressing must be removed within 24 hours.

Packaging

- Product is individually packaged; multiple units are packaged in a corrugated cardboard box.
- Individual pouch is designed to be easily opened on any edge, providing quick access.
- Case Packaged Size & Weight:
